Competition Announcement

The Youth Safety in Urban Environments Competition (#cities4youth2021)

Are you a young agent of change and passionate about safety and security in your urban context?

The Safe Urban Environments Program (SUEP) is a brand-new initiative proudly led by Global Infrastructure Basel Foundation, in partnership with ICLEI – Local Governments for Sustainability, hosted by Swiss Philanthropy Foundation, with the support of Fondation Botnar. The SUEP ultimately aims at achieving a two-fold impact: that the urban environment itself is safer for young people but also that young people themselves feel safer in their environments and urban contexts.

As part of its Kick-off activities in 2021, the program is launching the first Youth Safety in Urban Environments Competition from 3rd August - 7th September 2021.

This global competition is open to all young people from the ages of 15 – 24 years who live in urban contexts (cities) and would like to get the word out there about how they experience safe and security (or the lack there-off!) in their surroundings. There are 18 awards totalling 2300 Swiss Francs. There will be 15 awards (1st, 2nd, 3rd and 12 finalists) for the video, photo and drawing competition. Three other awards will go to participants who propose the three best names for the program.

- Young people passionate about safety and security in their urban context
- You would need some internet connectivity and access to google forms, Facebook and email.

When is it happening?

Competition opens for submissions on August 3rd at 15pm CEST and closes on September 7th at 23:59 CEST.

What is it about?

The competition has the objective of supporting the current program in understanding what safety and security issues young people face daily in their urban contexts. Additionally, as this program aims to be created with young people and for young people, we want You to suggest a new name for the program.
What do we mean by safety and security?

This is what we want to understand from you! Here are some examples: road safety, crime and violence, safety in public space, public transport, public harassment, sexual harassment, discriminative harassment, digital safety, accessing help, pollution, and contagious diseases.
