

Compact of States and Regions

Reporting platform: methodology and data points

Compact data points (see box below) can be submitted through any existing online reporting platform that is compliant with the Compact. Data must be reported publicly and on an annual basis.

The Compact will not endeavor to create a new protocol for collecting and reporting emissions data, instead recognizing the various methodologies currently being used by participating governments around the world. The reporting platform offers a set of existing methodologies to choose from when completing the questionnaire.

Participating governments will be asked whether data sources have been verified.

Data points of Compact of States and Regions

Government profile	
<ul style="list-style-type: none"> Government name Country Leader Title (e.g. Governor, Premier) Geographic characteristics Land area 	<ul style="list-style-type: none"> Current population Annual gross operating budget Main cities or urban centers Relationship with national governments Annual gross domestic product
Emissions accounting profile	
Accounting methodology	
<ul style="list-style-type: none"> 12-month accounting year dates Geopolitical boundary 	<ul style="list-style-type: none"> Has the inventory been verified? Inventory methodology
State-wide inventory breakdowns	
<ul style="list-style-type: none"> GHG's included in inventory Total emissions (either gross or net calculation) Total emissions from energy generation Total emissions from residential, commercial and industrial buildings and facilities 	<ul style="list-style-type: none"> Total emissions from transport Total emissions from waste Total emissions from agriculture Emissions from other sources (LULUCF)
State-wide electricity use	
<ul style="list-style-type: none"> Total electricity consumption Total electricity generation 	<ul style="list-style-type: none"> Associated GHG Emissions Electricity generation breakdown by energy source
Target(s) profile	
<ul style="list-style-type: none"> State-wide GHG emissions reduction target(s) Baseline emissions (tonnes CO₂, CO₂e) Baseline year Level of government that set target 	<ul style="list-style-type: none"> GHG sources to which the target applies Target year Target percentage
